

Fife Health Board Election

Keith lives in Dunfermline with his partner Lorna and young son Glenn.

He is an experienced decision maker having served on the boards of the Accounts Commission and held the post of President of the Convention of Scottish Local Authorities.

Keith says,

I believe that Fife Health Board should have three immediate priorities;

- Firstly, make sure that resources are targeted towards front line services;
- Secondly, continue to work towards a patient centred NHS where professional barriers are broken down to allow for creative ways of delivering NHS services more efficiently through partnership working.
- Thirdly, develop a preventative health strategy to tackle obesity and other illnesses and so help stop expensive hospital admissions.

If elected I will report annually to Fifers on my contribution to the Board
